September 2010

Lichens of the Celtic Rainforest with Andy Acton and Anna Griffith

11th and 12th September, 10am-4pm,

Ever noticed that the trees in Argyll are covered in colourful leafy lobes and crusts, or that the twigs often have pale green shrubby growths? The mild, wet weather here is ideal for lichens which grow alongside mosses, liverworts and ferns to give our ancient woodlands the appearance of a rainforest. This is your chance to find out more! Two days for £50. Booking Essential.
