

**ACTIVITY 3    MAKING THE PIN**

Take a piece of silver baking foil the same size as A4 paper

Fold the foil sheet in half

Fold the edges around three sides of the foil but not the edge that has the fold.

Fold the foil in half again

Rolling across the **length** of the foil rectangle.

Start to roll the edge of one side of the foil and roll towards the other side, keeping a straight line and as tight as possible. It is easier to roll from the bottom of the foil and move upwards.

Your foil should now be a tight 'tube' shape.

Now you can start to twist the tube shape from the top to the bottom, twisting the foil all the way down anti clockwise.

Finish by curling the top of the foil.

You can use the template below to check your pin shape

**PIN**
